

MEPAU in the Mid West

July 2024

Mitsui E&P Australia (MEPAU) is a WA-based energy provider with two facilities in the Mid West. MEPAU is a significant contributor to the development of a sustainable supply of energy for the nation and in addition to maintaining its energy resource portfolio, is pursuing new low carbon energy and carbon abatement opportunities.

Waitsia Gas Project Update

Waitsia Gas Project Stage 2B is proposing to drill up to five wells in the Waitsia production licence area, which may be tied-back via new flowlines to the Waitsia Gas Plant; plus drill an additional exploration well.

Following necessary approvals, activities are anticipated to start in the third quarter of 2024.

Schedule of Activities

MEPAU maintains an online Schedule of Activities that is regularly updated with planned activity information and timing – scan the QR code or go to mepau.com.au.

MEPAU at the Mingenew Midwest Expo

This year is the Mingenew Midwest Expo's 40th Anniversary, and MEPAU will be there in booth #14 alongside our Waitsia joint venture partner, Beach Energy, in booth #15 from 8-9 August 2024.

If you're at the event, come say hello to our team and learn more about our activities here in the Mid West.

Central Regional TAFE students visit site

Central Regional TAFE's Cert II Autonomous Technology students joined us for a site visit last month, touring the Dongara Production Facility and Xyris Production Facility.

The students learned about the technology and equipment in use across MEPAU's sites from Person In Charge – Perth Basin Nigel Done and Operator / Maintainer Sterling Winmar, who spoke with the students about the operations and interlinked safety measures, giving them an insight into future career pathways.

The students had a great visit and the team enjoyed having the opportunity to share their knowledge and inspire the next generation.
