Dear Mr Abdullah

**RE: NOPSEMA GENERAL DIRECTION 1897 – CLOSURE OF DIRECTION**

I refer to General Direction 1897 issued to Woodside Energy Limited [ACN 005 482 986] and Mitsui E&P Australia Pty Limited [ACN 108 437 529], the registered holders of WA-28-L on 23 December 2022.

The General Direction consisted of four parts – Directions 1, 2, 3 and 4 relating to the mitigation of risks associated with riser turret mooring (RTM) located in title WA-28-L. Following review of Woodside Energy's submitted response, and as the RTM has been removed and is no longer at risk of sinking or causing a collision in the offshore area, NOPSEMA is reasonably satisfied the registered holders of WA-28-L have satisfied the requirements of Directions 1, 2, 3 and 4. Therefore General Direction 1897 has now been closed.

NOPSEMA understands that Woodside will be undertaking an investigation to identify the RTM integrity failure mechanisms now that the structure is onshore. We encourage you to share lessons learnt from this investigation with NOPSEMA and Industry in the interests of improving the management of mooring systems and mitigating decommissioning risk in the future for other projects.

Should you have any queries regarding the above, please contact David Christensen on (08) 6188 8801.

Yours sincerely

Cameron Grebe
