

MEPAU in the Mid West

Mitsui E&P Australia (MEPAU) is the Australian headquarters for Mitsui & Co.'s energy investments in the region. MEPAU is focussed on establishing a responsible, reliable and sustainable energy supply to meet growing energy demands.

MEPAU is Operator of three facilities in the Mid West, including the Waitsia Gas Field, a joint venture with Beach Energy, which is located about 20km southeast of Dongara.

Clontarf students visit site

A group of Year 8 students from Geraldton Clontarf Academy were recently hosted by Clough at the Waitsia site to see first-hand what a project construction site looks like.

The 17 students heard from Clough's Construction Manager, Dean Goodall, and Lead project Engineer, Zac, about the Waitsia project, the engineering and construction industry, and their personal career journeys.

The students had a great day, and the Clough team enjoyed the opportunity to meet with the students and share their knowledge and passion to inspire the next generation.

Clough is delivering the engineering, procurement and construction (EPC) for MEPAU and Beach Energy's Waitsia Gas Project Stage 2 development.

National (Schools) Tree Planting Day

MEPAU was pleased to take part in last month's National (Schools) Tree Planting Day activities at Geraldton Primary School alongside the Geraldton Men in Sheds and Bunnings teams.

The event came about through a major partnership between Brighter with Natural Gas, an initiative of the Australian Petroleum Production & Exploration Association (APPEA), and the Australian Men's Shed Association.

The students received showbags including gardening tools and seedlings which were then planted on site, and a barbecue was held by local gas businesses, represented by MEPAU, an APPEA member and which has a longstanding involvement with Dongara Men's Shed.

The alliance supports initiatives aimed at uniting regional, rural and remote Men's Shed communities while promoting mental well-being and environmental sustainability.
